Nvidia presents
Nemotron-4 340B

What else is happening?

- After two years of testing, **McDonald's** has decided to end its automated order-taking project, which was part of a partnership with **IBM**. This AI project aimed to optimise operations and speed up their drive-thru services.
- **Google** has unveiled the "**Personal Health LLM**," a fine-tuned version of **Gemini** designed for wearables. This LLM understands the data obtained from smartwatches and heart rate monitors, allowing it to answer queries and make predictions accurately.
